# RUSTLER™ – WHERE ADVENTURE BEGINS

## RUSTLER™

Built for serious play, the job you love or both, the New Holland Rustler™ utility vehicles combine rugged construction and gritty performance with an ultra-smooth ride and feel-good amenities. The result for you is the kind of “go-anywhere, do-anything” confidence that makes your work fun. And play? Rustler makes playtime a blast. *When the road ends, that’s where Rustler adventure begins.*

# RUSTLER : FOR YOU IT'S SERIOUS BUSINESS

# Rustler

## PERSONALISED TO FIT YOUR NEEDS

With three 4WD models, available in two or four passenger versions, petrol or diesel power, the perfect Rustler utility vehicle is ready for you. And you can accessorise it just the way you want.

## DRIVES LIKE A CAR

The wide range CVT (Continuously Variable Transmission) provides high torque with a 40kph top speed. This exclusive design eliminates the need for a high / low range making it easy to drive, just like a car.

All Rustler models have a sealed CVT as standard equipment for traversing water or operating in dusty conditions.

## SUPERIOR DOWNHILL BRAKING

With a combination of four-wheel hydraulic disc brakes and CVT engine braking standard on all Rustler models.

\*Some vehicles shown with optional equipment

## OUTSTANDING OVERALL GROUND CLEARANCE

With the best combination of ground clearance and approach angle, the Rustler is designed so the lowest point is between the axles, not the middle of the machine. When other machines bottom out, Rustler keeps on going.

## QUALITY CONSTRUCTION AND SOLID ENGINEERING

Means you can rely on Rustler utility vehicles for the long haul. The body is constructed from high-gloss, coloured panels with interlocking joints which provide excellent impact-resistance for added durability.

## CERTIFIED ROPS

(Roll Over Protective Structure) All models feature a 4-point certified ROPS frame (6-point certified ROPS on 4 passenger models) with operator / passenger grab handles, canopy and retractable seat belts for safe operator protection.

## MAKE ONE YOUR OWN

A wide selection of Rustler options, accessories and attachments allows you to create a utility vehicle that's built to your exact specifications. So customize to your hearts content and claim your Rustler vehicle at your New Holland dealer.

Tyres are perfectly suited for every model to maximize stability and capitalize on the design of each model.

## AIRCRAFT-GRADE ALUMINIUM FRAME

Used for the Rustler 120 and 125. It's rust-proof, corrosion-resistant, light in weight and extremely strong. The engineers call it a better "power-to-weight ratio." You'll call it awesome, because your Rustler takes you wherever you need to go without worry.

## RUSTLER 115 : WORKS HARD – PLAYS EVEN HARDER

### THE ENTRY LEVEL RUSTLER!

With solid power, rugged construction and easy handling, the Rustler 115 is ready for big jobs and major recreation. With shift-on-the-go 4WD, the smooth and sporty Rustler 115 gives you a premium value with a long list of standard features that simply are not available on most vehicles in this class.

Like independent rear suspension that gives you a smooth ride, and superior CVT engine braking. The transmission automatically helps to slow you down when you're travelling downhill so you have better braking control. You also get the benefit of more horsepower so you're always ready for anything.

### A BED BOX THAT'S THE LARGEST IN THE COMPACT CLASS

20% more than some competitor models, means you can haul larger loads. Optional electric tip.

### LARGE-BLOCK, V-TWIN PETROL ENGINE

Boasts 20% more displacement, 8% more horsepower and more torque than other vehicles in the same class, so you put more muscle to work for you.

### INDEPENDENT REAR SUSPENSION

A feature not available on most vehicles of this size, ensures you get a smooth ride. The best-in-class ground clearance also allows you to easily handle rough, uneven terrain.

### SPACIOUS, OPEN OPERATOR AREA

All Rustler models provide extra operator leg room with ease of entry and exit due to the minimal protrusion of the front wheels into the foot well.

## RUSTLER 120 : MAKES EVERY DAY A GOOD DAY

### THE PERFECT PARTNER

Whether the outdoors is your job, your passion, or both, the Rustler 120 is the perfect partner. Use its larger vehicle capacity to haul more, make fewer trips and handle large jobs with ease. Choose a two or four-passenger model, with seating that matches your preference, bench seats or bucket seats.

Every Rustler 120 gives you the confidence of true all-wheel drive and the security of knowing that your utility vehicle is constructed around a rust-proof frame made of aircraft grade 6061 aluminium. Welcome to another good day.

### DEPENDABLE DIESEL POWER

The Rustler™ 120 is powered by a durable, dependable, diesel engine that is used in skid steers, mini loaders, and mini excavators. The liquid cooled engine delivers 44.7Nm of torque to work hard or play!

### INTELLITRAK ALL-WHEEL DRIVE SYSTEM

It means there are NO gears to shift, NO levers to pull, NO buttons to push—just the gear you need when you need it. The Rustler transmission automatically shifts as needed, so you never need to stop and change gears if you encounter tough conditions.

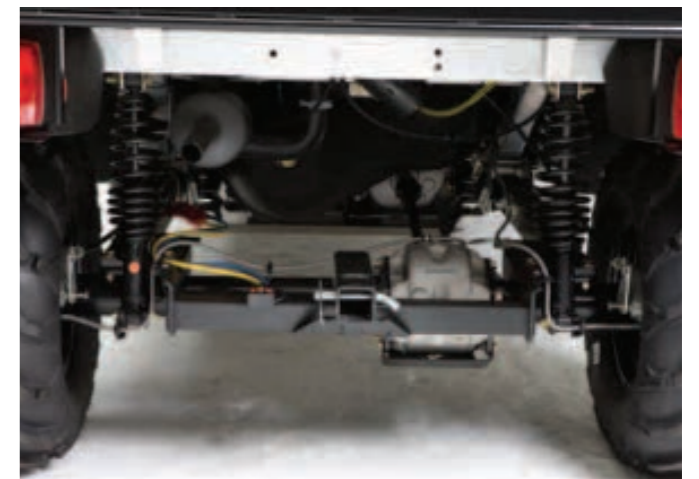

The automatic system always transfers power to the wheel(s) with the most traction.

Best of all, this system is fully mechanical, so there are no sensors or computers needed.

### A SUSPENSION BUILT FOR SMOOTHNESS

Independent double-A arm front suspension and swing-arm rear suspension with coil over shocks—means you and your passengers enjoy a smooth, stable, comfortable ride.

### POWDER-COATED STEEL BED BOX WITH RUSTPROOF ALUMINIUM FLOOR

More durable than the plastic you'll find on some vehicles and a standard 457kg high capacity\* bed for the largest of loads.

Rustler 120/125 also feature a standard electric tilt operated from the front console.

\*2 Passenger vehicle only

\*Some vehicles shown with optional equipment

## RUSTLER 125 : DO MORE

The Rustler 125 is built to move smoothly over rough ground, rocks, mud or sand.

Like the Rustler 120, the 125 also features the all-wheel drive system so you get the traction you need when you need it, without even thinking. This truly is as easy as it gets. And, the aircraft-grade aluminium frame means you'll barrel through wet, muddy or extreme conditions without fuss, and without fear.

\*Some vehicles shown with optional equipment

### HIGH POWER, SMOOTH OPERATION

This air cooled petrol engine boasts technology that helps ensure low emissions, high-power, and smooth operation with ground speed governing.

### A TILT STEERING COLUMN

A comfort feature not found on other brands, allowing each operator to find a perfect driving position.

### FOUR PASSENGER MODELS

Allow you to choose your own combination of two forward-facing rows of seats. You can choose bucket seats or bench seats.\*
