TeeJet® Nozzles

TeeJet® AI3070

The AI3070 TeeJet® dual flat spray tip, utilising a patent-pending design, provides two spray patterns at complementary angles of 30deg. and 70deg. from vertical. The leading pattern provides coverage of the rear of the crop and penetration for coverage within the canopy. The trailing pattern provides thorough coverage across the top of the crop canopy. The AI3070 is ideal for fungicide application and disease control in cereal crops.

AI3070-C
\$18.90
(Ex. GST)

NOZZLE & CAP NUT

AI3070 features and benefits:

- 30deg. forward tilted spray penetrates dense crop canopies, while the backward tilt 70deg. spray maximises coverage of the crop seed head.
- Drift resistant drops are produced through the use of a Venturi air aspirator.
- Large round free passages minimise clogging.
- All acetal construction for excellent chemical and wear resistance.
- Suggested spray pressure range of 1.5 - 6 bar (20-90 P.S.I.).

SPRAY SELECT

TeeJet Technologies has released a spray nozzle selection app for Apple and Android mobile devices. SpraySelect allows you to quickly and easily choose the proper nozzle for your application.

Just enter speed, spacing and your target rate, select your spray quality classification and a list of nozzle recommendations is provided.
