

Agriquip

AGRICULTURAL IMPLEMENT WHOLESALERS

The Agriquip BF100 PTO driven chipper shredder features a unique combination of a chipper blade and shredder knives that will efficiently chip and shred hard and green vegetation.

Equipped with a hydraulically powered feeding roller that is adjustable to give the optimum rotor speed to suit any tractor or the material being processed. Fully independent hydraulic system require no tractor hydraulics.

A start stop and reverse lever is located by the large chute opening and the mulch can be directed outwards in various positions.
